

Hirsch Performance

For the ultimate Saab experience

Improve on perfection

We wish you a warm welcome to Hirsch Performance. We would also like to congratulate you on choosing a Saab, one of the finest cars in the world. What we can promise you is that by adding that little extra touch to it, you can reach that ultimate Saab experience. So how do you improve on the perfection of a Saab? That is what we at Hirsch Performance are constantly asking ourselves. What we have found is that there are a few small but distinctive things you can do. You can bring out all the inherent power of Saab engines. You can enhance the already excellent handling characteristics of Saab cars. And last but not least, you can accentuate the exquisite Saab design. In short, you can add that little extra

something that makes the presence of perfection instantly apparent to all the senses. And you can do all this while staying true to Saab values. Being the exclusive performance upgrade partner to Saab Automobile, we can guarantee that our products completely harmonise with your Saab. Everything in the product design is there for a reason. Nothing is superfluous. This promise is underlined by the fact that your Saab warranty will be retained. Should you wish to order Hirsch Performance products or enquire about them, you are welcome to contact your nearest Saab dealer. Please also visit our website www.hirsch-performance.ch for more information.

The art of precision

Saab is our passion

At Hirsch Performance we work exclusively with Saab cars and have done so from the very start, back in 1967. This reveals our passion for Saab and what we do. It also points to the expertise we possess when it comes to upgrading Saab cars. It is also why we can promise to add a unique driver and ownership experience to your Saab. From the Hirsch Performance development centre in Switzerland, we offer you a full range of performance upgrades and sporty accessories.

Long heritage

Originally established in 1967 as a Saab dealership, we have four decades of Saab experience. We are based in St. Gallen and have grown to become a Saab competence centre with activities that stretch far beyond the borders of Switzerland. Remaining a relatively slim and agile organisation, our way of doing things continues to be characterised by speed and flexibility.

Exclusively Saab

Hirsch Performance is the sole official partner of Saab Automobile for performance upgrades worldwide.

Premium quality

Hirsch Performance offers a high-quality range of performance upgrades and accessories. We pride ourselves on extreme attention to detail and on unrelenting commitment to the tradition of Swiss quality.

High-tech innovation

Our design philosophy is perhaps best described as controlled evolution. By this we mean an innovative approach to sharpening and refining every aspect of performance. It is really an extremely controlled art, one that requires not only long experience but also the latest technology.

How we work

We start with a Saab product and, through careful research and testing, identify ways to optimise the driving experience. Everything we develop is designed with integrity and purpose, enhancing some aspect of performance. An ongoing dialogue with the worldwide Saab community ensures valuable feedback.

Meticulous process

The Hirsch Performance development centre features two rolling road dynamometers and an engine test cell, enabling accurate measurements and the simulation of extreme conditions. The result is then verified under real-life conditions in exhaustive road tests.

Retained warranty

In our work we always keep within safety and design limits, never compromising quality and durability. Every step of the way we stay true to Saab, which is why the Saab factory warranty is always retained. The standard servicing intervals also remain unchanged.

Complete portfolio

Hirsch Performance develops engine performance upgrades, exhaust systems, suspension systems, brakes, wheels, interiors, aerodynamic products and fully customised Saab models.

How to buy

Hirsch Performance products are sold and installed only at authorised Saab dealers. Contact your local dealer or visit www.hirsch-performance.ch to find out more.

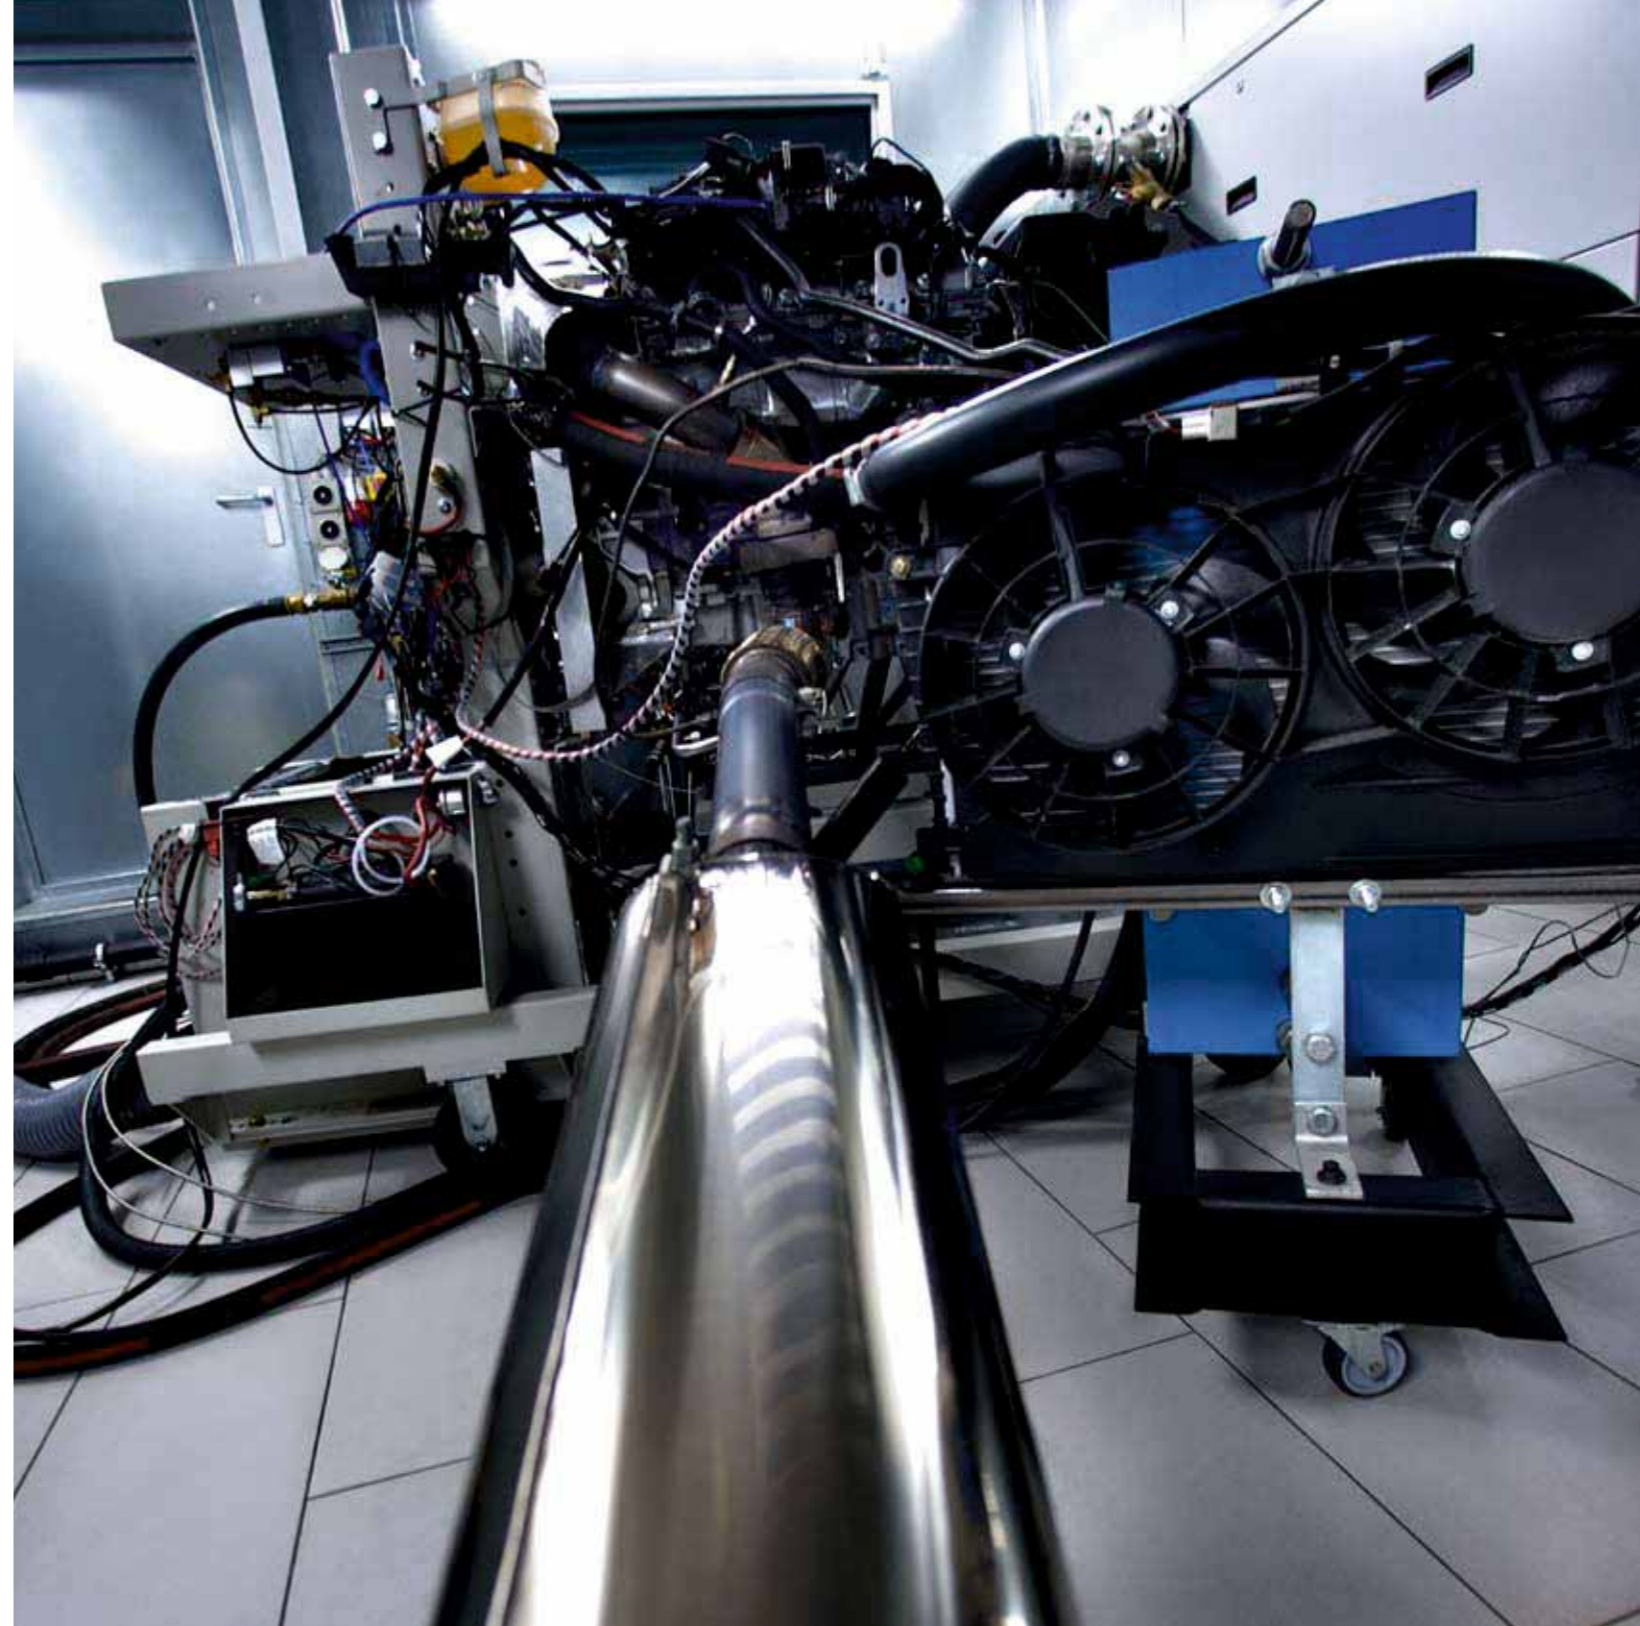

Prepare for extreme performance

There is nothing ordinary about a Saab engine. The innovative Saab turbo technology means power, vitality and impressive torque. Now imagine unleashing the full potential of a Saab engine, increasing the top-end output of your Saab by between 10–40%, depending on the model. Add to that the same increase in ripping torque and acceleration. That is what Hirsch Performance upgrades are all about. Making a Saab that much more extraordinary through relatively small adjustments.

Saab 9-3 2.8T equipped with

- 300hp/430Nm.
- 6-Twin spoke 19X8" alloy wheels.
- Mesh grille.
- Carbon fiber aerodynamic kit.
- 17" 345 mm brake upgrade.
- Sports suspension.

Exhilarating performance

Driving a top-of-the-line Saab is an exciting experience. Boosting its already powerful engine with a Hirsch Performance upgrade takes you to an even higher level of driving pleasure. You can rest assured that the already intelligent power of a Saab will now outsmart most other cars on the road. Careful software calibration ensures that despite the enormous increase in power and torque, the higher thermal and physical loads are kept within manufacturer tolerances.

Inspiring performance

The revolutionary Saab turbo technology combined with cutting edge expertise has resulted in engines that are both powerful and efficient. Saab calls this responsible performance and it means you have all the power you need, while showing respect for nature. Whether you are equipped with a fuel-efficient, low-emission turbodiesel or a BioPower engine, Hirsch Performance lets you add power and vitality in a CO₂-optimised way. That's what we call a truly inspiring opportunity.

Entertaining performance

With the Hirsch Performance upgrades, Saab petrol engines receive a vitamin injection that makes them deliver between 20 and 60 more horsepower than the original, depending on the model. In parallel, torque is increased by a similarly impressive 45–80 Nm over a wide rpm range. As you can imagine, this means a completely new and decidedly more entertaining driving experience.

Underline your style

Hirsch Performance has designed a range of components that add an extra dimension to your Saab. Take for example the stylish exhaust systems made of stainless steel. Their smooth lines give your Saab a more dynamic appearance and just the right touch of extravagance. Meticulous research and testing lie behind the flow-optimised tubing that minimises back pressure and improves throttle response. Add to that the carefully tuned mufflers and Helmholtz resonators providing a powerful, sporty and well-balanced sound.

Saab 9-3 1.9TTiD is equipped with

- 200 hp / 420 Nm.
- 6-Twin spoke 19x8" alloy wheels.
- Stainless steel dual exhaust system.
- Carbon fiber aerodynamic kit.
- Spoiler and diffuser.
- 17" 345 mm brake upgrade.
- Sports suspension.

Excite your senses

The purpose of Hirsch Performance is to enhance both the form and function of your Saab, offering products that touch your senses in a subtle but distinctive way. From the instrument panel through to the aluminium pedals and wheels, all the components are manufactured to the highest quality standards and perfectly harmonised with each other and with the rest of the design.

Leather instrument panel

The Hirsch Performance leather instrument panel creates a whole new interior. We use carbon leather, which is a new grade of leather with a carbon-fibre structure. The result is a truly unique cockpit design. The leather instrument panel can be ordered separately or together with the Hirsch Performance aluminium pedals.

Leather interior set for the Saab 9-3

The Hirsch Performance leather interior set includes front and rear door handles, handbrake lever and smart-slot cover. These high-quality leather accessories complement the standard or premium leather option and the Hirsch Performance leather instrument panel.

Aluminium pedals

Hirsch Performance has designed exclusive pedals of unique fit and quality, complementing the other aluminium applications in your Saab. For optimal strength, the racing-style pedals are each CNC-machined from a single billet of aluminium. And like true racing pedals, the aluminium has been drilled out to save weight. Finally, the pedals are equipped with non-slip rubber gripping pads for perfect control. Fits the Saab 9-3 and 9-5.

Spoiler

Aerodynamic products from Hirsch Performance are created through exhaustive tests in the wind tunnel and make a significant contribution to reducing vehicle lift. The result is lower drag, better handling at high speeds and a sporty appearance to match. Some of the best examples are the rear spoiler for the Saab 9-5 SportCombi and the aerodynamic kit for the Saab 9-3.

Stainless steel sports exhaust systems

A smooth idle purr, a relaxed partial load rumble and a gratifying roar at high rpm with wide-open throttle. This is the sound of a Hirsch Performance exhaust system. It is also the result of many hours of work in the acoustics lab and on the road, tweaking the configuration of the system to perfectly enhance the character of Saab automobiles.

The tailpipes are polished, chromed and embossed with the Hirsch Performance logotype. In order to integrate the dual exhaust systems in a harmonious way, the system is delivered with a corresponding rear skirt.

Through careful flow-optimised design of all the pipes, bends and muffler components, back pressure has been reduced in comparison with the standard exhaust system. The fact that the entire system is made of stainless steel ensures a maximum of durability and a minimum of maintenance. All necessary mounting parts are included to facilitate installation.

Just like all other Hirsch Performance products, the exhaust systems are compliant with EU homologation requirements and are shipped with the necessary documentation. Vehicles equipped with Hirsch Performance products remain covered by the Saab warranty. For the Saab 9-3 and 9-5, Hirsch Performance offers dual exhaust systems, regardless of whether you have a Diesel, BioPower or petrol engine model.

Add to your pleasure

Hirsch Performance can offer you high-quality wheels, suspension systems and brakes that enhance the already excellent handling that you enjoy in a Saab. Reduced unsprung weight, a lowered centre of gravity and even better stopping power are some the beneficial effects. Not to mention the sportier and more awe-inspiring impression your Saab will make.

Saab 9-3 Aero is equipped with

- 300 hp/400Nm.
- Stainless steel dual exhaust system.
- 5-Twin spoke 18x8" alloy wheels.
- 17" 345 mm brake upgrade.
- Sports suspension.
- Roof spoiler.

Brake upgrade

With the Hirsch Performance brake system, you can be sure that the stopping power is always there when you need it. We achieve this by using well-proven, deceptively low-key single piston technology that is scaled up generously. This also optimises cooling performance. Furthermore, the small number of moving parts exposed to the hot and corrosive environment ensures excellent reliability and durability.

Sport chassis for the Saab 9-5

The Hirsch Performance sport chassis lowers the centre of gravity, which means the handling and braking performance of your Saab 9-5 are improved and a sportier stance is created. The sport chassis has been developed to ensure that comfort and handling are well balanced and that the Saab safety systems operate correctly under extreme conditions. Fitting the sport chassis means that the car is lowered by approximately 15 mm.

Sport springs for the Saab 9-3

The specially developed Hirsch Performance sport springs lower the centre of gravity of your Saab 9-3 by approximately 20 mm. The result is even better driving dynamics with improved handling and braking performance, while ensuring that the Saab safety systems operate correctly under extreme conditions. Another advantage is of course an even sportier appearance.

Alloy wheels

Hirsch Performance has developed alloy wheels in four outstandingly stylish and distinctive designs, enhancing the appearance of your Saab. The high-performance wheels are either flow formed (5-twin spoke) or manufactured using a low-pressure casting process (3-spoke and 6-spoke) and are both outstandingly lightweight and robust. The reduced unsprung mass improves both dynamic properties and comfort. What is more, perfect roundness has been ensured, minimising the need for balance weights. These characteristics may be hard to notice for the untrained eye, but you may notice the smooth, vibration-free ride.

3-Twin spoke 19x8" alloy wheel.
(Saab 9-3)

Sharpen your appearance

Attention to detail is at the heart of what we do at Hirsch Performance. The quality of the smallest part often determines how well a system functions and how it is perceived. Likewise, a small but elegant accessory can have great impact on overall appearance. Hirsch Performance Expressions is a range of high-quality products specifically designed to accentuate your lifestyle and reflect the values of the Hirsch Performance Saab you drive. You are warmly welcome to explore our entire range at www.saabexpressions.com

Swiss Army knife
Victorinox multi-tool with large blade, small blade, can opener with small screwdriver, bottle opener with large screwdriver & wire stripper, reamer with sewing eye, corkscrew, toothpick, tweezers and key ring.

Umbrella
Umbrella with stable windproof frame. 23.5 inches.
Material: Aluminium
Weight: 0.340 KG
Size: L 89,5xØ120 CM

Key Ring
A specially designed key ring for Hirsch Performance with shape and size of the Hirsch Performance plaque.

Watch
A specially designed watch for Hirsch Performance with solid stainless steel case, leather strap, date functions and 10 ATM water resistance.

Polo Shirt
High-quality polo shirt made of a coolmax material that helps the body stay cool. Hirsch Performance badge on the chest. 60% cotton/40% coolmax.

T-shirt
Men's T-shirt with ribbed neckline and Hirsch Performance logo printed on the shoulder.

Jacket
Classic-fitting performance jacket in water-resistant and breathable stretch softshell. Pocket on left arm, two "hidden" zip pockets and waist drawstring. Hirsch Performance badge at the chest and Hirsch Performance reflective print on the arm.

Pen
A high-quality ergonomic ballpoint with raised grip dots and a comfortable triangular shape. Push-button retractable design and strong metal pocket-clip. Matt silver and glossy black finish.

Cap
High quality cap made of microfibre with a Hirsch Performance badge at the front. Adjustable velcro back strap.
